

FRAMINGHAM HEART STUDY CODING MANUAL

Clinic Exam Data: Interview, Physical Exam, ECG

COHORT: Original
TIME INTERVAL: Original Cohort Exam 30
DATASET NAME: e_exam_ex30_0_0274d
OBSERVATIONS: 141

Variables that define a unique record: PID.

There were 141 Original Cohort participants who attended Exam 30, of which 119 participants used data collection Form A and 22 participants used data collection Form B. Form A and Form B have overlapping sections as well as unique sections. Use variable FW616 (found in dataset however not found on data collection form) to subset participants who used Form A or Form B. The annotated data collection form contains both forms A and B concatenated.

The following variables found on the data collection form have been excluded from this dataset. They can be found in separate datasets. Refer to the annotated form for variable names and page numbers:
FW007, date of this FHS exam, page MD01 (use most recent exam dates file).
FW013-FW019, Medical History - Prescription and Non-Prescription Medications, pages MD03-MD04 (use corresponding medications dataset)
FW380-FW406, Cognitive Function - Mini-Mental State Exam, pages TECH05-TECH06 (use corresponding MMSE dataset)

The following variables found on the data collection form have been excluded from this dataset. They are used for administrative purposes only:
FW308-FW332, Procedures Sheet, Adverse Events and Exit Interview, page TECH02
FW555-FW578, Referral Tracking, page REF1

See the accompanying protocol and annotated data collection form for additional information regarding the variables. The data collection form has a hierarchical pattern with regard to some questions. Refer to "e_exam_ex30_0_0274_annotated_form.pdf" file to get a full understanding of the hierarchical layout of questions and variables.

For many pages of the questionnaire there is a "whole page blank" variable which signifies an entire page is not filled in or left blank.

Proxy names FW543 and FW549 have been deleted to preserve confidentiality.

This dataset is a modified version of the original dataset. Some observations were deleted due to consent restrictions. This coding manual is based on the original dataset. Therefore the value ranges, number of observations and/or cohorts found in the modified dataset, may differ from those stated in this manual.

IDTYPE

Variable name: IDTYPE

Description: Framingham Heart Study cohort identifier

Code or Value	Description	Count
0	Original Cohort	141

Note: IDTYPE and ID taken together form a unique study participant identification number.

ID

Variable name: ID

Description: Framingham Heart Study participant identifier within a cohort

Note: IDTYPE and ID taken together form a unique study participant identification number.

ID deleted - use random ID (PID)

Description: Medical History - Chest Discomfort: Usual duration (min)
 Variable appears on Form A only
Units: minutes

Code or Value	Description	Count
2 — 60	Range of values	5
0	FW069 = 0	110
1	1 min or less	1
888	Not applicable/ question not included in administered form	22
900	15 hours or more	0
.	Unknown	3

Note: FW069-FW084 are related variables. See annotated form for the relationship between related variables.

FW075

Variable name: FW075
Description: Medical History - Chest Discomfort: Longest duration (min)
 Variable appears on Form A only
Units: minutes

Code or Value	Description	Count
60 — 60	Range of values	1
0	FW069 = 0	110
1	1 min or less	1
888	Not applicable/ question not included in administered form	22
900	15 hours or more	0
.	Unknown	7
