**Feeling Thermometer:** To help people say how good or bad a health state is, we have drawn a scale (rather like a thermometer) on which the best state you can imagine is marked by 100 and the worst state you can imagine is marked by 0.

We would like for you to indicate on this scale, in your opinion, how good or bad your own health is **TODAY**. Please do this by drawing a line from the center of the box below to whichever point on the scale indicates how good or bad your current health state is.

**Instructions:** This questionnaire contains a set of questions which ask about various aspects of your health. When answering these questions please think about your health and your ability to do things on a day-to-day basis, during the past 4 weeks. To define the 4 week period, please think about what the date was 4 weeks ago and recall the major events that you have experienced during this period. Please focus your answers on your overall abilities, disabilities and how you felt during the past 4 weeks.

You may feel that some of these questions do not apply to you, but it is important that we ask the same questions of everyone. Also, a few questions are similar; please excuse the apparent overlap and answer each question independently.

Please read each question and consider your answers carefully. For each question, please select one answer that best describes your level of ability or disability during the past 4 weeks. Please indicate the selected answer by checking the box beside the answer.

All information you provide is confidential. There are no right or wrong answers; what we want is your opinion about your abilities and feelings.

**INSTRUCTIONS: PLEASE READ CAREFULLY**

Think about the past 4 weeks. The next few pages list various activities you might have done. Certain activities are done more frequently at different times of year, but we only want you to think about the last 4 weeks. Before you begin, please review the following steps and examples:

**Step #1: Number of times each week**

- > For each activity, write in the space provided how many times each week, on average, you did that activity.
- > If you did an activity less than once a week or not at all, please write a zero in the space provided.
- > If you did not do an activity at least one time per week, skip step 2.

For example, if you did not do the activity at all or did it less than once a week during the past 4 weeks:

Example A	Step #1	Step #2					
	<b>Number of times a week</b> <small>(If less than 1 time per week or none, write "0")</small>	<i>(When "Times a week" is "0", skip this part)</i>					
<b>Activities:</b>		Less than 1 hour a week	1-2½ hours a week	3-4½ hours a week	5-6½ hours a week	7-8½ hours a week	9 hours a week
Mow Lawn	Times a week <div style="display: flex; align-items: center; justify-content: center;"> <div style="border: 1px solid black; width: 20px; height: 20px; margin-right: 5px;"></div> <div style="border: 1px solid black; width: 20px; height: 20px; margin-right: 5px;"></div> <span style="font-size: 20px; margin-left: 5px;">→</span> </div>	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>	6 <input type="checkbox"/>

**Step #2: Total Time, average, each week**

- > If you did the activity at least once a week, mark one box representing how much total time, on average, you spent doing it each week. For example, if you go to the senior center 30 minutes on Monday, 30 minutes on Wednesday, and 30 minutes on Friday for a total of 1½ hours each week:

Example B	Step #1	Step #2					
	<b>Number of times a week</b> <small>(If less than 1 time per week or none, write "0")</small>	<i>(When "Times a week" is "0", skip this part)</i>					
<b>Activities:</b>		Less than 1 hour a week	1-2½ hours a week	3-4½ hours a week	5-6½ hours a week	7-8½ hours a week	9 hours a week

## TO BE COMPLETED BY THE PARTICIPANT

**Feeling Thermometer:** To help people say how good or bad a health state is, we have drawn a scale (rather like a thermometer) on which the best state you can imagine is marked by 100 and the worst state you can imagine is marked by 0.

We would like for you to indicate on this scale, in your opinion, how good or bad your own health is **TODAY**. Please do this by drawing a line from the the center of the box below to whichever point on the scale indicates how good or bad your current health state is.

**Feeling Thermometer:** To help people say how good or bad a health state is, we have drawn a scale (rather like a thermometer) on which the best state you can imagine is marked by 100 and the worst state you can imagine is marked by 0.

We would like for you to indicate on this scale, in your opinion, how good or bad your own health is **TODAY**. Please do this by drawing a line from the the center of the box below to whichever point on the scale indicates how good or bad your current health state is.
