**seqnum04**

*(Retain ECG in patient folder - do NOT send or FAX to CTC)*

### **days04** 1 Date of recording:

		/			/				
Month			Day			Year			

### **reason04** 2 Reason for recording:

- |   |   |
|---|---|
| <b>1</b> <input type="radio"/> Baseline (drug free) | <b>2</b> <input type="radio"/> Pre-hospital discharge (drug treated patients) |
| <b>3</b> <input type="radio"/> 6 mo                 | <b>5</b> <input type="radio"/> 1 yr   |
| <b>7</b> <input type="radio"/> 1 yr 6 mo            | <b>9</b> <input type="radio"/> 2 yr   |
| <b>11</b> <input type="radio"/> 2 yr 6 mo           | <b>13</b> <input type="radio"/> 3 yr  |
| <b>15</b> <input type="radio"/> 3 yr 6 mo           | <b>17</b> <input type="radio"/> 4 yr  |

### 3 Rhythm at time of recording:

*(check all that apply)*

**nsr04**  Sinus rhythm (normal, tachy, or brady)

**paced04**  Paced

**af04**  Atrial fibrillation/flutter

**othrhy04**  Other:

--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--

### 4 Heart rate:

--	--	--

**hr04**

bpm

OR

average RR

--	--	--	--

**avgrr04**

msec

### 5 Intervals:

PR interval

**pr04**

--	--	--

msec

or

**nopr04**

PR not measurable (AF or paced)

QRS duration

**qrs04**

--	--	--

msec

QT interval

**qt04**

--	--	--

msec

6 ECG Abnormalities:

Is patient continuously paced?

**cpaced04**  1 Yes -> Skip the remainder of this page  
 0 No -> Complete the following:

Yes  1 No  0

**qwaves04**  Presence of abnormal Q waves (or abnormal R waves in V1)  
 If yes, location:

Anterior **qan04**     Inferior **qinf04**     Lateral **qlat04**     Posterior **qpost04**

**block04**  Heart block  
**typblk04** If yes, specify degree:

1 1st degree     2 2nd degree Mobitz I     3 2nd degree Mobitz II  
 4 Advanced or high degree     5 3rd degree

**lbbb04**  LBBB - If present, the LBBB is:  
**lbbnew04**  1 Old     2 New     3 Unknown

**rbbb04**  RBBB - If present, the RBBB is:  
**rbbnew04**  1 Old     2 New     3 Unknown

**lafb04**  LAFB Left axis deviation (superiorly directed QRS axis  $\geq -30$  degrees) and initial small R wave and terminal deep S in II, III, aVF.

**lpfb04**  LPFB Right axis deviation (inferiorly directed QRS axis  $\geq 110$  degrees) and initial small Q wave and tall R in II, III, and aVF in the absence of RBBB, RVH, or lateral myocardial infarction.

**ivcd04**  IVCD QRS  $\geq 100$  msecs, but if  $\geq 120$  msecs not in any typical BBB pattern.

**lvh04**  LVH (Local site definition)
