

VARIABLE	DESCRIPTION
DTHJD39	Date of death obtained from any source: 13 Mortality form 02 Follow-up form 16 Complication form 14 Hospital Discharge form 10 Surgery form 07 Exercise Test form NDI report Long-term Follow-up form for Registry patients.
ET1M39	Exposure time for survival analysis method 1, medical. 1) if vital status is dead, then enrollment to death 2) if vital status is alive and no surgery, then enrollment to censorship 3) if vital status is alive and surgery, then enrollment to surgery
ET1S39	Exposure time for survival analysis method 1, surgical. 1) if vital status is dead then surgery to death 2) if vital status is alive then surgery to censorship
ET239	Exposure time for survival analysis method 2. medical group 1) if vital status is dead, then enrollment to death minus the site specific mean average number of days to surgery for the surgical group 2) if vital status is alive, then enrollment to censorship minus the site specific mean average number of days to surgery for the surgical group surgical group 1) if vital status is dead, then surgery to death 2) if vital status is alive, then surgery to censorship
ET339	Exposure time for survival analysis method 3. 1) if vital status is dead, then enrollment to death 2) if vital status is alive then enrollment to censorship
ET439	Exposure time for survival analysis method 4. medical group 1) if vital status is dead, then enrollment to death minus the site specific mean average number of days to surgery for the surgical group 2) if vital status is alive, then enrollment to censorship minus the site specific mean average number of days to surgery for the surgical group surgical group 1) if vital status is dead, then surgery to death 2) if vital status is alive, then surgery to censorship

- TH139 Therapy for survival analysis method 1.
 medical group, all patients not having prior bypass surgery
 (including those who also qualify for surgical group)
 surgical group, all patients not having prior bypass surgery
 who receive bypass surgery at any time after enrollment.
 Note that these patients are included in the medical group
 until the time of their surgery.
 1 MEDIC medical
 2 SURG surgical
- TH239 Therapy for survival analysis method 2.
 medical group, all patients who did not have prior bypass
 surgery and who did not have bypass surgery within 90 days
 of enrollment
 surgical group, those patients who did not have prior bypass
 surgery and who did receive bypass surgery within 90 days of
 enrollment
 1 MEDIC medical
 2 SURG surgical
- TH339 Therapy for survival analysis method 3.
 medical and surgical groups determined by recommended therapy
 for registry patients, by randomization assignment for
 randomized patients; patients having prior bypass surgery are
 excluded
 1 MEDIC medical
 2 SURG surgical
- TH439 Therapy for survival analysis method 4.
 medical group, those patients who did not have prior bypass
 surgery and who did not have bypass surgery within the 95%
 cut-off period in days from enrollment
 surgical group, those patients who did not have prior bypass

surgery and who did receive bypass surgery within the 95%
cut-off period in days from enrollment
95% cut-off period: site-specific time period in which 95% of
patients who received bypass surgery had their surgery
1 MEDIC medical
2 SURG surgical

VS1M39 Vital status for survival analysis method 1, medical.
1 DEAD dead if patient died without having undergone
surgery
0 ALIVE alive otherwise

VS1S39 Vital status for survival analysis method 1, surgical.
1 DEAD dead if patient died any time after surgery
0 ALIVE alive otherwise

VS239 Vital status for survival analysis method 2, both medical and
surgical groups.
1 DEAD dead if patient died
0 ALIVE alive otherwise

VS339 Vital status for survival analysis method 3, both medical and
surgical groups.
1 DEAD dead if patient died
0 ALIVE alive otherwise

VS439 Vital status for survival analysis method 4, both medical and
surgical groups.
1 DEAD dead if patient died
0 ALIVE alive otherwise
