

8.0: Chronic Events - Overview

A. CSSCD Forms (collection) and Datasets (storage) Relating to Events:

<u>Form #</u>	<u>Name of Form</u>	<u>Collected</u>	<u>Patient Population</u>	<u>SAS Dataset</u>
62	Renal Complications	03/01/79- 05/31/86	All	R62.SD2
		06/01/86- 09/30/88	Patients Entered at < 6 Months of Age	
70	Renal Complications Follow-up Form (Hematuria and Urinary Tract Infection)	10/01/82- 05/31/86	All	R70.SD2
		06/01/86- 09/30/88	Patients Entered at < 6 Months of Age	
71	Renal Complications Follow-up Form (Proteinuria and Renal Insufficiency)	10/01/82- 05/31/86	All	R71.SD2
		06/01/86- 09/30/88	Patients Entered at < 6 Months of Age	
64	Aseptic Necrosis	03/01/79- 05/31/86	All	R64.SD2
		06/01/86- 09/30/88	Patients Entered at < 6 Months of Age	
"65"	Aseptic Necrosis Central Review Results	—	All with aseptic necrosis reported on a form 64 prior to 7/83.	R65.SD2
60	Leg Ulceration	03/01/79- 05/31/86	All	R60.SD2
		06/01/86- 09/30/88	Patients Entered at < 6 Months of Age	
66	Ocular Complications	03/01/79- 05/31/86	All	R66.SD2
		06/01/86- 09/30/88	Patients Entered at < 6 Months of Age	
50, 50E, 57	Priapism	***SEE SECTION 7.8***		

8.0: Chronic Events - Overview

B. Definitions of Chronic Events:

Renal Complications (See Section 8.1)

- Hematuria
 - A history of gross hematuria confirmed by a member of the medical team or > 20 RBC/HPF from urinalysis
- Urinary Tract Infection
 - > 20 WBC/HPF in an uncontaminated clean catch urine specimen or urine culture resulting in the growth of more than 10^5 colonies/ml.
- Persistent Proteinuria (nephrotic syndrome)
 - 3+, 4+ protein reaction on two consecutive early AM urine specimens measured by dip stick on the absence of gross hematuria.
- Renal Insufficiency

Prior to 10/82:

Two consecutive determinations of creatinine > 1.5 mg/dl for patients over 10 years of age, or > 0.8 for patients less than ten years of age, followed by creatinine clearance < 100 ml/min/1.73 m.

After 10/82:

A 20% increase in serum creatinine followed by a two-hour creatinine clearance of < 100 cc/minute.

Aseptic Necrosis (See Section 8.2)

- Early radiographic findings of sub-epiphyseal lucency and widening of a joint space or late radiographic changes of flattening of the epiphysis and sclerosis with fragmentation.

Leg Ulcers (See Section 8.3):

- Ulceration of the skin of the lower legs, especially the medial or lateral surfaces, which fails to heal in a period of two weeks.

Ocular Complications (See Section 8.4)

- Suspected Stage III retinopathy (nonvascular capillary buds at the site of arteriolar-venular anastomoses)
- A two line visual loss since the last examination
- Changes in the macula

8.0: Chronic Events - Overview

Chronic Priapism (Section 7.8)

- A semi-erection of the penis which has not completely disappeared for a month (originally diagnosed as acute priapism)
- More than one episode of acute priapism

J62URDT2 JF62CCDT
- I. Collection Information:
Form 62 (Renal Complications) was to be completed when any of the following occurred:
 1. Hematuria: a history of gross hematuria, confirmed by a member of the medical team or > 20 RBC/HPF from urinalysis.
 2. Urinary Tract Infection (UTI): > 20 WBC/HPF in an uncontaminated clean catch urine specimen or urine culture resulting in the growth of more than 10^5 colonies/ml.
 3. Persistent Proteinuria (Nephrotic Syndrome): 3+ or 4+ protein reaction on two consecutive early AM urine specimens measured by dip stick in the absence of gross hematuria.
 4. Renal Insufficiency: two consecutive determinations of creatinine > 1.5 mg/dl for patients over 10 years of age or > 0.8 for patients less than 10 years of age, followed by creatinine clearance < 100 ml/min/1.73m. After 10/82, the definition was modified as follows: a 20% increase in serum creatinine followed by a two hour creatinine clearance of < 100cc/min.

8.1.1: Renal Complications – Form 62

Prior to October 1982, Form 62 was used for both initial and follow-up visits for renal complications. The schedule for follow-up visits prior to 10/82 is summarized below:

- Hematuria
 - a) a yearly follow-up was to be done for a repeat episode of hematuria;
 - b) renal papillary necrosis was to be followed every three months until the condition was stable and then every six months.
- Urinary Tract Infection
 - UTI was to be followed at three months and at six months. If the condition had not resolved or recurred, the patient was to be seen every three months.
- Persistent Proteinuria
 - The patient was to be seen every three months until the condition became stable and then every six months.
- Renal Insufficiency
 - The patient was to be seen every month until the condition became stable and then every six months.

After 10/82, Form 62 continued to be used for only the initial visit for a renal Complication. Form 70 was used for follow-up of hematuria and urinary tract Infections (See Section 8.1.2) and Form 71 was used for follow-up of preteinuria and renal insufficiency (See Section 8.1.3).

J. Data Collection Period: 03/79 – 09/88

Form 62 was used between 03/79 and 06/86 for all patients and continued to be used for patients entered at < 6 months of age through 09/88.

K. Form Version Dates: 08/03/82

L. Files Used to Store Information:

SAS System File: **R62.SD2**

Format File: **R62.FMT**

M. Unique Record Identifiers: **ANONID, F62DATE**

Records within the SAS dataset are sorted by **ANONID** and **F62DATE**.

N. Number of Observations (Patients) in SAS Dataset: 673 (416)

8.1.1: Renal Complications – Form 62

O. Contents of SAS Dataset:

- Alphabetical Listing of Variables: See pp. 7-10
- Listing of Variables by Position: See pp. 11-14

P. Notes About Selected Variables: None

Q. Computed Variables: None

R. Inter-Relationship With Other Datasets:

1. Data from follow-up visits for renal complications were collected on

Phase 1 Forms	SAS Dataset	Complication	See Section
Form 70	R70.SD2	Hematuria, UTI	8.1.2
Form 71	R71.SD2	Proteinuria, Renal Insufficiency	8.1.3

2. Renal function test data, urinalysis, and/or urine culture results were also collected on routine visit forms:

Phase 1 Forms	SAS Dataset	See Section
Form 12	R1222.SD2	4.4
Forms 19, 20, 22, 24	R1722.SD2	4.5
From 25	R25.SD2	4.6

3. The Acute Treatment Follow-up Form (Form 52) was required for renal events for which patients were hospitalized (See Section 7.10).
4. Other sources which collected information about renal complications are

Phase 1 Forms	SAS Dataset	See Section
Form 10	R10.SD2	2.3
Form 26	R20.SD2	10.1

	84	2	ABSENT

F62URMR3:
1. Urinalysis 2 required only for proteinuria.

F62URMW3 ----- URINALYSIS 2 MICROSCOPIC >20 WBC
type: numeric (float)
label: F62URMW3
range: [1,2] units: 1
unique values: 2 coded missing: 583 / 673

tabulation:	Freq.	Numeric	Label
	13	1	PRESENT
	77	2	ABSENT

F62URMW3:
1. Urinalysis 2 required only for proteinuria.

F62URMC2 ----- URINALYSIS 2 MICROSCOPIC CASTS
type: numeric (float)
label: F62URMC2
range: [1,2] units: 1
unique values: 2 coded missing: 587 / 673

tabulation:	Freq.	Numeric	Label
	6	1	PRESENT
	80	2	ABSENT

F62URMC2:
1. Urinalysis 2 required only for proteinuria.

8.1.2: Renal Complications Follow-up Form – Form 70 Hematuria and Urinary Tract Infection

F62URCH2 ----- URINALYSIS 2 MICROSCOPIC CASTS-HPF

type: numeric (float)

label: F62URCH2

range: [4,16] units: 1

unique values: 3 coded missing: 589 / 673

tabulation:	Freq.	Numeric	Label
	0	1	RBC(1)
	0	2	WBC(2)
	4	4	GRANULAR(4)
	0	8	HYALINE(8)
	2	12	
	78	16	NONE(16)

F62URCH2:

1. BINARY CODED VARIABLE: Refer to explanation of 'binary coding' in PART II.
2. Urinalysis 2 required only for proteinuria.
3. Required only if F62URMC=1.

F62CC ----- 2 HOUR CREATININE CLEARANCE ML-MIN * C

type: numeric (float)

range: [1,496] units: 1

unique values: 18 coded missing: 655 / 673

mean: 81.1111

std. dev: 112.17

percentiles:	10%	25%	50%	75%	90%
	7	15	56.5	100	131

F62CC:

1. Required only for renal insufficiency.

_dta:

1. Run on 08/24/99.

A. Collection Information:

Form 70 (Renal Complications Follow-up Form for Hematuria and Urinary Tract Infection) was completed at follow-up visits for hematuria and urinary tract infections. Schedules for follow-up are presented below:

Urinary Tract Infection (UTI) Chart

Initial Visit

If urine culture is positive or > 20
WBC/HPF from urinalysis
-DO-

BUN
Serum creatinine
Form 70
Repeat Urine Culture

First Follow-up Visit
(Within two weeks of initial visit)

**8.1.2: Renal Complications Follow-up Form – Form 70
Hematuria and Urinary Tract Infection**

Hematuria Chart

Initial Visit

If RBC > 20 RBC/HPF from urinalysis
-DO-
Uric Acid
BUN
Serum Creatinine
ASO
CBC
Urine Culture

First Follow-up Visit

(Within two weeks of initial visit)

8.1.2 RENAL COMPLICATIONS FOLLOW-UP FORM

If RBC > 20 RBC/HPF from urinalysis
-DO-
IVP
Two-hour Creatinine clearance
BUN

FORM 70

4

If RBC ≤ 20 RBC/HPF from urinalysis
-DO-
No more tests until one-month visit.

**8.1.2: Renal Complications Follow-up Form – Form 70
Hematuria and Urinary Tract Infection**

- B. List of variables deleted **F70DATE F70INIT F70NDATE F70LASTU F70LASTE F70ESTAT F70VDATE F70FCB F70URDT F70URNDT F70BUNDT F70SCDT F70URADT F70CCDT F70IVPDT F70RENDT F70PLADT F70CYSDT**
 - C. List of variables modified **NONE**
 - D. List of variables modified with a name change **NONE**
 - E. Old name
 - F. New name
 - G. List of variables modified date to days since DOE
 - H. Old name **F70DATE F70URDT F70URNDT F70BUNDT F70SCDT F70URADT F70CCDT F70IVPDT F70RENDT F70PLADT F70CYSDT**

8.1.2: Renal Complications Follow-up Form – Form 70
Hematuria and Urinary Tract Infection

I. New name **JF70DATE JF70URDT J70URNDT J70BUNDT JF70SCDT
J70URADT JF70CCDT J70IVPDT J70RENDT J70PLADT J70CYSDT**

J. Data Collection Period: 10/82 – 09/88

Form 70 was used between 10/82 and 06/86 for all patients and continued to be used for patients entered at < 6 months of age through 09/88.

K. Form Version Dates: 09/16/82

L. Files Used to Store Information:

SAS System File: **R70.SD2**

Format File: **R70.FMT**

M. Unique Record Identifiers: **ANONID, F70DATE, F70VISIT**

Records within the SAS dataset are sorted by **ANONID, F70DATE**, and **F70VISIT** (follow-up visit number).

N. Number of Observations (Patients) in SAS Dataset: 334 (179)

O. Contents of SAS Dataset:

- Alphabetical Listing of Variables: See pp. 57-58
- Listing of Variables by Position: See pp. 59-60

P. Notes About Selected Variables: None

Q. Computed Variables: None

R. Inter-Relationship With Other Datasets:

1. Renal event data were also collected on

Phase 1 Forms	SAS Dataset	See Section
Form 62	R62.SD2	8.1.1
Form 71	R71.SD2	8.1.3

2. Renal function test data, urinalysis, and/or urine culture results were also collected on routine visit forms

Phase 1 Forms	SAS Dataset	See Section
Form 12	R1222.SD2	4.4
Forms 19, 20, 22, 24	R1722.SD2	4.5
Form 25	R25.SD2	4.6

3. History of renal complications was also collected on

Phase 1 Forms	SAS Dataset	See Section
Form 10	R10.SD2	2.3

**8.1.2: Renal Complications Follow-up Form – Form 70
Hematuria and Urinary Tract Infection**

Form 26

1. See APPENDIX H - PATHOGEN LIST.
 2. Required only if F7OURINE=1.

8.1.3: Renal Complications Follow-up Form – Form 71 Proteinuria and Renal Insufficiency

F70BUN ----- BUN MG-DL

type: numeric (float)

range: [1,126] units: 1
unique values: 28 coded missing: 128 / 334

mean: 10.2476
std. dev: 12.0212

percentiles: 10% 25% 50% 75% 90%
5 6 7 10 16

F70CRTN ----- SERUM CREATININE

type: numeric (float)

range: [.1,7.1] units: .1
unique values: 21 coded missing: 128 / 334

mean: .808252
std. dev: .750661

percentiles: 10% 25% 50% 75% 90%
.4 .5 .7 .9 1.2

F70URA ----- URIC ACID

type: numeric (float)

range: [2.5,33] units: .1
unique values: 55 coded missing: 163 / 334

mean: 5.38596
std. dev: 2.60439

percentiles: 10% 25% 50% 75% 90%
3.7 4.2 5 6.1 7.3

F70CC ----- CREATININE CLEARANCE ML-MIN

type: numeric (float)

range: [23,956] units: 1
unique values: 12 coded missing: 322 / 334

mean: 160.417
std. dev: 255.183

percentiles: 10% 25% 50% 75% 90%
29 43.5 98 142.5 167

8.1.3: Renal Complications Follow-up Form – Form 71 Proteinuria and Renal Insufficiency

F70IVPDN ----- IVP DONE
type: numeric (float)
label: F70IVPDN

range: [1,2] units: 1
unique values: 2 coded missing: 7 / 334

tabulation: Freq. Numeric Label
280 1 NOT DONE
47 2 DONE

F70IVPNA ----- IVP NORMAL
type: numeric (float)
label: F70IVPNA

range: [1,2] units: 1
unique values: 2 coded missing: 294 / 334

tabulation: Freq. Numeric Label
17 1 NORMAL
23 2 ABNORMAL

F70IVPNA:

1. Required only if F70IVPDN=2.

F70RENSC ----- RENAL SCAN DONE
type: numeric (float)
label: F70RENSC

range: [1,2] units: 1
unique values: 2 coded missing: 26 / 334

tabulation: Freq. Numeric Label
297 1 NOT DONE
11 2 DONE

F70RENNNA ----- RENAL SCAN NORMAL
type: numeric (float)
label: F70RENNNA

range: [1,2] units: 1
unique values: 2 coded missing: 328 / 334

tabulation: Freq. Numeric Label
2 1 NORMAL
4 2 ABNORMAL

F70RENNNA:

1. Required only if F70RENSC=2.

8.1.3: Renal Complications Follow-up Form – Form 71 Proteinuria and Renal Insufficiency

F70PLADN ----- PLASMA RENIN DONE
type: numeric (float)
label: F70PLADN

range: [1,2] units: 1
unique values: 2 coded missing: 26 / 334

tabulation: Freq. Numeric Label
303 1 NOT DONE
5 2 DONE

F70PLASA ----- PLASMA RENIN NGM-DL
type: numeric (float)

range: [.,.] units: .
unique values: 0 coded missing: 334 / 334

tabulation: Freq. Value

F70PLASA:

- Required only if F70PLADN=2.

F70CYSDN ----- CYSTOSCOPY DONE
type: numeric (float)
label: F70CYSDN

range: [1,2] units: 1
unique values: 2 coded missing: 25 / 334

tabulation: Freq. Numeric Label
299 1 NOT DONE
10 2 DONE

F70CYSDN:

- Optional after 3rd confirmation of hematuria.

F70CYSTO ----- CYSTOSCOPY NORMAL
type: numeric (float)
label: F70CYSTO

range: [1,2] units: 1
unique values: 2 coded missing: 327 / 334

tabulation: Freq. Numeric Label
6 1 NORMAL
1 2 ABNORMAL

F70CYSTO:

- Required only if F70CYSDN=2.

_dta:

- Run on 08/24/99.

A. Collection Information:

8.1.3: Renal Complications Follow-up Form – Form 71 Proteinuria and Renal Insufficiency

Form 71 (Renal Complications Follow-up Form for Proteinuria and Renal Insufficiency) was completed for follow-up visits for proteinuria and renal insufficiency. Schedules for follow-up of these events are presented below:

Proteinuria Chart

Initial Visit
(At time of second urinalysis)

-DO-
Uric Acid
BUN
Serum Creatinine
CBC
ASO

First Follow-up Visit
(Within one month of diagnosis)

-DO-
Serum Protein Electrophoresis
24-hour Urine

Second Follow-up Visit
(Within one month of first follow-up visit)

If Urine Protein > 1 gm/m² from 24-hour Urine
-DO-
Urine Protein Immunoelectrophoresis
Urine Protein Electrophoresis
Serum Cholesterol
Serum C₃
Serum C₄
Doubly-refractive fat bodies in urine
Optional: Renal Biopsy

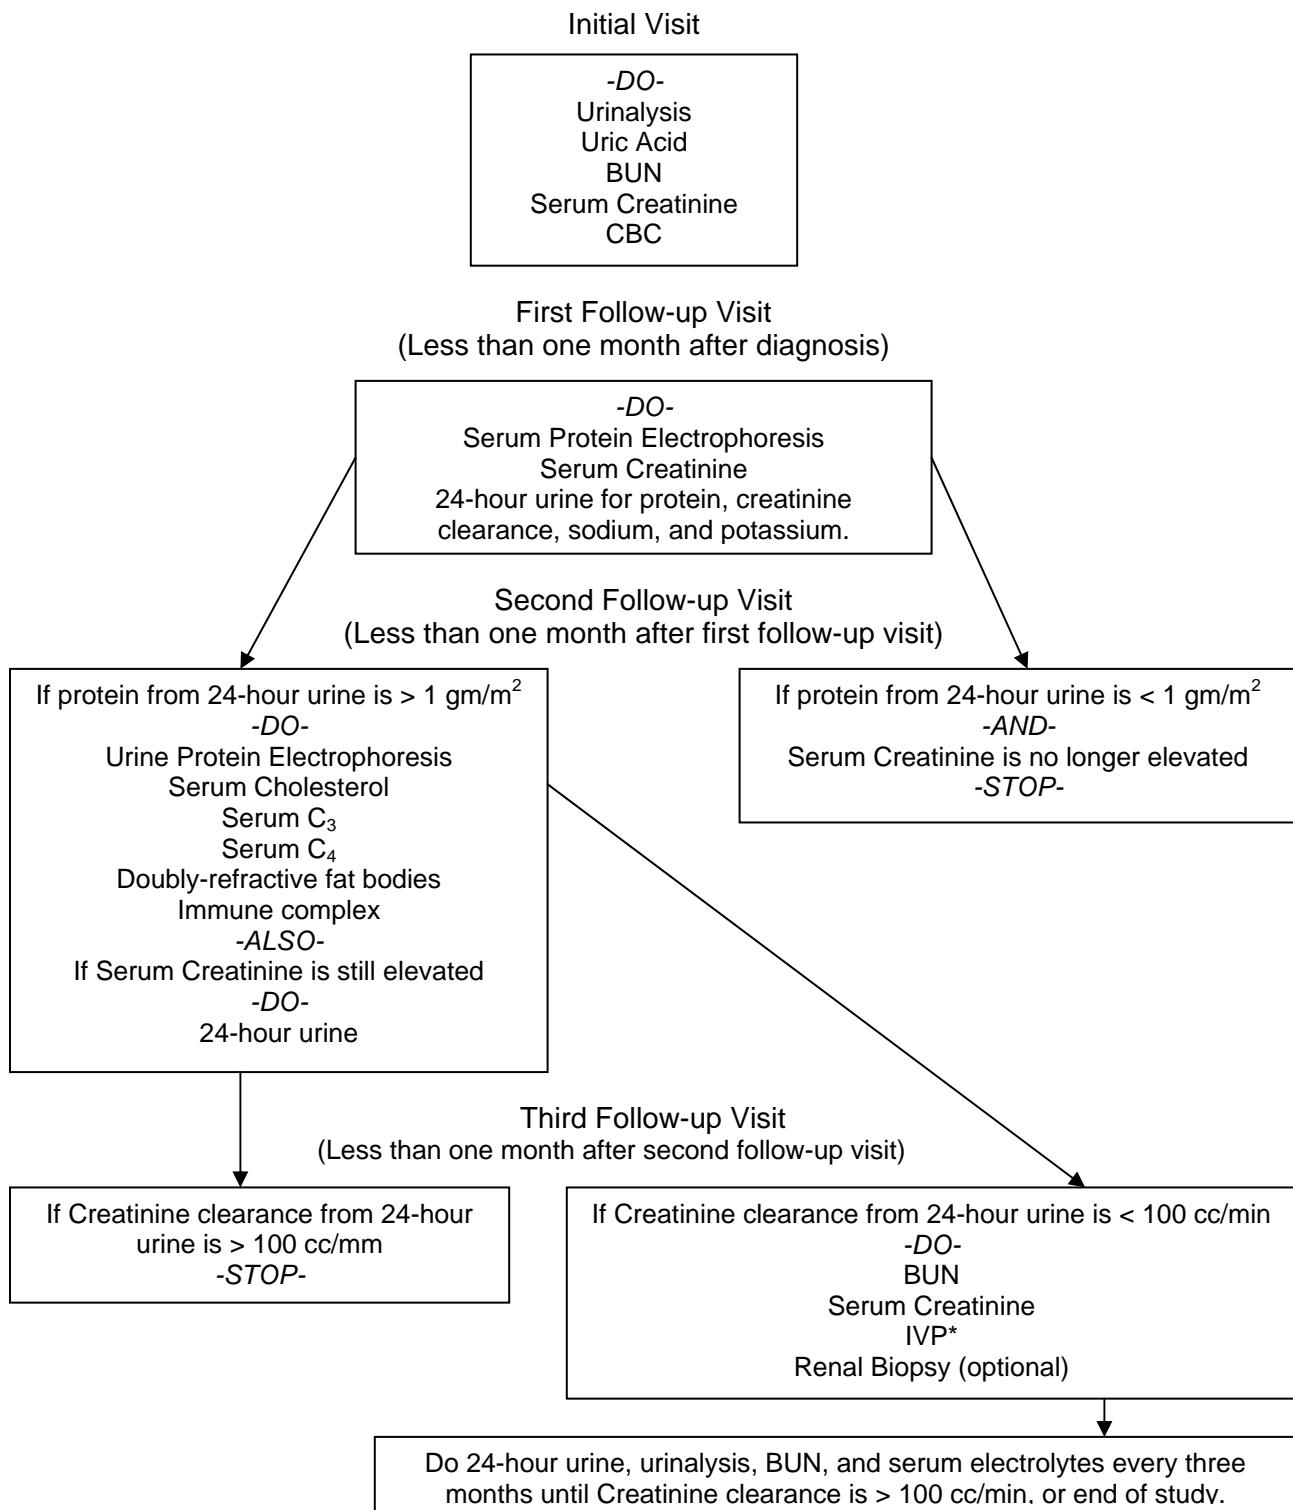

If Urine Protein < 1 gm/m²
-STOP-

Do 24-hour urine and urinalysis every month until three months from diagnosis, then every six months until the end of the study.

Note: Renal scan and plasma renin determination are optional if patient has a history of hypertension (diastolic blood pressure \geq 90 mm Hg on two consecutive visits).

Renal Insufficiency Chart

**8.1.3: Renal Complications Follow-up Form – Form 71
Proteinuria and Renal Insufficiency**

*Abdominal film should be performed to determine renal size if the BUN is too high for the IVP to be performed.

Note: Renal scan and plasma renin determination are optional if patient has a history of hypertension (dialstolic blood pressure \geq 90 mm Hg on two consecutive visits).

8.1.3: Renal Complications Follow-up Form – Form 71 Proteinuria and Renal Insufficiency

- B. List of variables deleted **F71DATE F71INIT F71NDATE F71LASTU F71LASTE F71ESTAT F71VDATE F71FCB F71URDT F71SERDT F71SCDT F17BUNDT F71SEEDT F71UPDT F71SECDT F71SRC3D F71SRC4D F71DRFDT F71INCDT F71UPIDT F71IVPDT F71ABDDT F71REBDT F71RSCDT F71PLADT**
- C. List of variables modified **NONE**
- D. List of variables modified with a name change **NONE**
- E. Old name
- F. New name
- G. List of variables modified date to days since DOE
- H. Old name **F71DATE F71URDT F71SERDT F71SCDT F71BUNDT F71SEEDT F71UPDT F71SECDT F71SRC3D F71SRC4D F71DRFDT F71INCDT F71UPIDT F71IVPDT F71ABDDT F71REBDT F71RSCDT F71PLADT**

- J. Data Collection Period: 10/82 – 09/88
Form 71 was used between 10/82 and 06/86 for all patients and continued to be used for patients entered at less than 6 months of age through 09/88.
- K. Form Version Dates: 09/16/82
- L. Files Used to Store Information:
SAS System File: **R71.SD2**
Format File: **R71.FMT**
- M. Unique Record Identifiers: **ANONID, F71DATE, F71VISIT**
Records within the dataset are sorted by **ANONID, F71DATE** (date of initial Form 62 for event), and **F71VISIT** (follow-up visit number).
- N. Number of Observations (Patients) in SAS Dataset: 79 (37)
- O. Contents of SAS Dataset:
 - Alphabetical Listing of Variables: See pp. 77-79

8.1.3: Renal Complications Follow-up Form – Form 71 Proteinuria and Renal Insufficiency

- Listing of Variables by Position: See pp. 80-82

P. Notes About Selected Variables: None

Q. Computed Variables: None

R. Inter-Relationship With Other Datasets:

1. Renal event data were also collected on

Phase 1 Forms	SAS Dataset	See Section
Form 62	R62.SD2	8.1.1
Form 70	R70.SD2	8.1.2

2. Renal function test data, urinalysis, and/or urine culture results were also collected on routine visit forms.

Phase 1 Forms	SAS Dataset	See Section
Form 12	R1222.SD2	4.4
Forms 19, 20, 22, 24	R1722.SD2	4.5
Form 25	R25.SD2	4.6

3. Information regarding history of renal complications was also collected on

Phase 1 Forms	SAS Dataset	See Section
Form 10	R10.SD2	2.3
Form 26	R20.SD2	10.1

A. List of variables deleted **F64DATE F64INIT F64NDATE F64LASTU F64LASTE F64ESTAT F64VDATE F64DFC F64FCB**

8.2.1: Aseptic Necrosis – Form 64

- B. List of variables modified **NONE**
- C. List of variables modified with a name change **NONE**
- D. Old name
- E. New name
- F. List of variables modified date to days since DOE
- G. Old name **F64DATE**
- H. New name **JF564DATE**
- I. Collection Information:

Form 64 (Aseptic Necrosis) was filled out whenever a study patient entered the clinic, emergency room, or hospital with:

Early radiographic findings of sub-epiphyseal lucency and widening of the joint space or late radiographic changes of flattening of the epiphysis and sclerosis with fragmentation.

The form was also filled out 1) if a study x-ray of the shoulder and/or hip demonstrated aseptic necrosis, as defined above, even if the patient was not complaining of pain or limitation in the affected joint(s) or 2) the condition had been diagnosed prior to entry and the x-rays performed as part of the entry evaluation confirmed the diagnosis. Once the condition was confirmed, follow-up visits and completion of Form 64 were required every six months for the duration of the study. Form 64 was also to be completed whenever the patient was seen for acute problems as a result of the condition. Patients who were previously diagnosed as having aseptic necrosis and had replacement of the affected joint by a prosthesis were to have a Form 64 completed at entry. Follow-up was required only if a problem occurred with that joint.

- J. Data Collection Period: 03/79 – 09/88

Form 64 was used between 03/79 and 06/86 for all patients and continued to be used for patients entered at < 6 months of age through 09/88.

- K. Form Version Dates: 03/01/79, 08/15/80

- L. Files Used to Store Information:

SAS System File: **R64.SD2**

Format File: **R64.FMT**

- M. Unique Record Identifiers: **ANONID, F64DATE**

Records within the SAS dataset are sorted by **ANONID** and **F64DATE**.

8.2.1: Aseptic Necrosis – Form 64

N. Number of Observations (Patients) in SAS Dataset: 2,697 (484)

O. Contents of SAS Dataset:

- Alphabetical Listing of Variables: See pp. 109-111
- Listing of Variables by Position: See pp. 112-113

8.2.1: Aseptic Necrosis – Form 64

H. Notes About Selected Variables:

- **F64SIT1-6** – are the variable names for sites of aseptic necrosis. Refer to Appendix F—Body Locator Charts/Site Code Lists—for sites other than the humerus or femur.
- **F64XCD1-6** – are the variable name for x-ray codes. Note that 733 codes are ICD-9 disease codes and “400” codes are x-ray diagnosis codes.
- **MED11-13, MED21-23, MED31-33, MED41-43, MED51-53, MED61-63** – are variable names for medications. Refer to Appendix D—Coded Drug List for codes.
- **F64LIMIT** – combines responses for two questions: whether the patient had any limitation of activity due to aseptic necrosis AND whether the patient currently uses any aids for the condition. If more than one aid was used, a code of 8 (other) was entered.

P. Computed Variables:

- **F64SITES** – is the variable name for number of sites of aseptic necrosis. The value was computed by counting the number of non-missing values for **F64SIT1-6**.

Q. Inter-Relationship With Other Datasets:

1. Data related to aseptic necrosis were also collected on

Phase 1 Forms	SAS Dataset	See Section
12,16, 20, 22, 75	<u>R75.SD2</u>	6.3
12, 22, 76	<u>R76.SD2</u>	6.4
83	<u>R83.SD2</u>	9.1
25	<u>R25.SD2</u>	4.6
	(variables: F10SURHP, F25DTEHP)	
10	<u>R10.SD2</u>	2.3
	(variables: F10ASNE, F10OPHR, F10OHPRD)	

2. In June 1983, clinics were instructed to forward x-rays used to make the diagnosis of aseptic necrosis to radiologists at the University of Tennessee for verification. Results of the review are stored in **R65.SD2** (See Section 8.2.2). X-rays for sites of aseptic necrosis which were diagnosed late in the study or reported on Form 64s received late in the study were not reviewed.

8.2.1: Aseptic Necrosis – Form 64

3. The following summary status variables are stored in the patient roster (case) dataset **R09.SD2**.

SHOULDER, HIP: x-ray status variables

ANDATE: Date of first aseptic necrosis form on database

VARDATE: (estimated) date of initial diagnosis of aseptic necrosis

“Form” 65 (Aseptic Necrosis Central Review Results) contains results of reviews of x-rays submitted for patients for whom at least one aseptic necrosis form (Form 64) was submitted. Clinics were instructed to forward x-rays used to make the diagnosis of aseptic necrosis to Dr. Alfred Kraus at the University of Tennessee for verification in June 1983. The reviewers were radiologists from the University of Tennessee. Many x-rays for sites of aseptic necrosis which were diagnosed late in the study or reported on Form 64s received late in the study were not reviewed.

- H. New name **JF60DATE J60START JF60NEXT J60RESDT**
- I. Collection Information:

Form 60 (Leg Ulceration) was completed each time a study patient presented at a study participant clinic, emergency room, or hospital with an ongoing leg ulceration (per definition – See 8.0).

8.3: Leg Ulceration – Form 60

A separate form was required to be completed for each ulcer that occurred. Once an ulcer occurred, it was followed until it healed, with follow-up visits scheduled approximately every month, until 6 months, and then every 3 months. Follow-up information was also collected on Form 60, with the distinguishing variable **F60TYPE** indicating the difference between initial visit information for a given ulcer, and follow-up information for the same ulcer. Sequencing the follow-up information then involves sorting by visit date (**F60DATE**) for a given ulcer.

J. Data Collection Period: 03/79 – 09/88

Form 60 was used between 03/01/79 and 06/01/86 for all patients and continued to be used for patients entered at < 6 months of age until 10/88.

K. Form Version Dates: 03/01/79, 12/01/80

Not all information from the first form has been retained to the final dataset.

Variables considered unimportant or unusable from early forms were permanently dropped from the dataset.

L. Files Used to Store Information:

SAS System File: **R60.SD2**

Format File: **R60.FMT**

M. Unique Record Identifiers: **ANONID, F60DATE, F60SITE, F60ULCER**

Records within the data set are sorted by **ANONID**, the date patient visited the clinic for treatment (**F60DATE**), the identifying site code from the CSSCD Leg Ulcer Locator Chart (**F60SITE**), and identifying ulcer number *within* the gridsite (**F60ULCER**).

Because of the chronic nature of the Leg Ulcer disorder, both the first presentation at clinic for a given ulcer, and subsequent follow-up visits for that ulcer are recorded on separate Form 60s. Consequently, there can be multiple “Record 60s” associated with a given ulcer event which spans time. In addition to the unique record identifiers mentioned above, additional variables are necessary to determine the span of an individual discrete ulcer event. For a complete explanation of how to relate Initial “Record 60s” to Follow-up “Record 60s”, see Section 8.3.J.

N. Number of Observations (Patients) in SAS Dataset: 2926 (226)

8.3: Leg Ulceration – Form 60

O. Contents of SAS Dataset:

- Alphabetical Listing of Variables: See pp. 154-155
- Listing of Variables by Position: See p. 156

P. Notes About Selected Variables:

- **F60START, F60WORK, F60SCHL, F60OLD, F60OLD1, F60OLD2, F60OLD3, F60BEFOR, F60WARN, F60HURT** – The questions associated with these variables were required to be asked at the initial visit only for a given ulcer.
- **F60WORK, F60SCHL** – On the 03/01/79 version of the form, questions associated with these variables were to be asked only when the ulcer resolved. However, on the updated version (12/01/80) of the form, questions associated with these variables were to be asked at the initial visit for a given leg ulcer.
- **F60NMSET** – is a concatenated numeric variable consisting of 4 2-digit codes which identify other event forms completed in addition to the Form 60. Values are left justified, so that if fewer than 4 other forms are filled out, there will be trailing zeros. For example, a value of “46000000” means that the only form filled out in addition to the Form 60 is a Form 46 Acute Anemic event.
- **F60HURT** – a 0 value for this variable is the code for “not applicable”. In cases where the final follow-up occurs on a date beyond the final healing of the given ulcer, this question could not be legitimately answered. This value differs from missing, where the question was not asked.

Q. Computed Variables: None

R. Inter-Relationship with Other Forms and Datasets:

1. Relationship of Form 60 “Initial” forms to Form 60 “Follow-up” forms

Because of the chronic nature of the Leg Ulcer disorder, both the first presentation at a clinic for a given ulcer, and subsequent follow-up visits for that ulcer are recorded on separate Form 60s. The unique record identifiers for each Form 60 (**ANONID, F60DATE, F60SITE, F60ULCER**) put the records in order by date, and by gridsite. But additional variables are required to determine discrete ulcer events which span time.

The variable (**F60TYPE**) delineates initial from follow-up visits. The date of visit variable (**F60DATE**) equates with date patient first sought care for the event (the date variable commonly recorded for other forms) on form 60s where

8.3: Leg Ulceration – Form 60

F60TYPE=1 (Initial) only. A discrete event can be isolated by creating an ULCERNUMBER variable that assigns the same ULCERNUMBER to the initial form and all follow-up forms that follow it, up until the next initial form is encountered (**F60TYPE=1**).

Multiple ulcer events can occur over time at the exact same place (**F60SITE**, **F60ULCER**). The beginning of a new ulcer event is earmarked by **F60TYPE=1**. One of the problems with this dataset is that, in some cases, an initial form was not sent in by the clinic. An initial form is one whose date precedes all those with the same **F60SITE & F60ULCER** number, and whose **F60TYPE=1**, and is verifiably the first of the ulcer series since the date of visit (**F60DATE**) is the same as the “date first sought care” value (this value is on the form, but not the database). When an initial Form 60 is not available, the assumption is that information spanning the full ulcer event is incomplete.

Events missing an initial form can be identified by a change in site code (**F60SITE**) and/or ulcer number (**F60ULCER**) when events are being sequenced; or by determining a positive resolution status on an immediately prior form (**F60RESOL=1**) with a resolution date filled in (**F60RESDT**). The subsequent ulcer event consisting of just follow-up forms can then be isolated from the other events.

A final note on distinguishing end dates of ulcer events. Sometimes the final follow-up Form 60 associated with a given ulcer may have been filled out (i.e., the clinic visit occurred) *after* the ulcer had already healed. In these cases the **F60DATE** will be later than **F60RESDT**, and many of the questions relating to the status of the ulcer will not have been filled in or are “not applicable”. In particular, on most forms of this nature, size of the ulcer will be recorded as 0. Depending on the type of information required on this ulcer, there are a variety of ways to deal with a form like this. This is simply a notice to be aware that such a juxtaposition of recording does exist.

2. Leg ulcer surgeries

An area of interest in the analysis of leg ulcers is the surgical procedures performed on the ulcers. The variable **F60TREAT** contributes information indicating whether a surgery has been done. All of the forms related to a given ulcer, both initial and follow-up must be searched to determine whether the given

8.3: Leg Ulceration – Form 60

ulcer, both initial and follow-up must be searched to determine whether the given ulcer was ever treated with surgery. In order to confirm surgical intervention, a search for Form 83s (Surgery) can be done on variable **F83PICDA**, the postoperative diagnosis in **R83.SD2**, where positive values lie between 707.00 and 707.99, which identifies forms generated by surgical procedures relating to “chronic ulcers of the skin” (See Section 9.1). The actual dates of the surgeries are not identified on the Form 60s, but are available on the Form 83s using the above method. Searching for Form 83s between the beginning (initial) and ending dates (**F60DATE**) of a discrete ulcer event may not identify all ulcers treated with surgery, since the surgery form may be dated slightly after the last visit date for that ulcer, since it is often the culminating treatment.

3. Transfusion for leg ulcers

To determine whether chronic transfusion was used to treat a leg ulcer, a search of transfusion visit dates (**F84DATE** in **R84.SD2**) between the beginning (initial) and **F60DATE** on the last follow-up form associated with a discrete ulcer event can be performed (See Sections 9.2.1 and 9.2.2).

F60TREAT:

1. BINARY CODED VARIABLE: See explanation for 'binary coding' in PART II.

F60RESOL ----- RESOLUTION OF ULCER

type: numeric (float)
label: F60RESOL

range: [1,2] units: 1
unique values: 2 coded missing: 59 / 2926

tabulation:	Freq.	Numeric	Label
	2265	1	NO
	602	2	YES

_dta:

1. Rerun on 08/19/99.

A. List of variables deleted **F66DATE F66INIT F66NDATE F66LASTU F66LASTE**

F66ESTAT F66VDATE F66DFC F66FCB F66PEB

8.4: Ocular Complications – Form 66

- B. List of variables modified **NONE**
- C. List of variables modified with a name change **NONE**
- D. Old name
- E. New name
- F. List of variables modified date to days since DOE
- G. Old name **F66DATE**
- H. New name **JF66DATE**
- I. Collection Information:

Form 66 (Ocular Complications) was to be completed only for those study patients who were detected to have any of the following conditions:

1. Suspected Stage III retinopathy (neovascular capillary buds at the site of arteriolar-venular anastomoses);
2. A two-line visual loss since the last examination;
3. Changes in the macula.

Each ocular complication was to be followed every six months, and Form 66 was to be completed by the Ophthalmologist associated with the study.

- J. Data Collection Period: 03/79 – 09/88
- K. Form Version Dates: 03/01/79, 10/10/80
- L. Files Used to Store Information:
SAS System File: **R66.SD2**
Format File: **R66.FMT**

- M. Unique Record Identifiers: **ANONID, F66DATE**
Records within the SAS dataset are sorted by **ANONID** and **F66DATE**.

- N. Number of Observations (Patients) in SAS Dataset: 220(164)

- O. Contents of SAS Dataset:
 - Alphabetical Listing of Variables: See pp. 180-182
 - Listing of Variable by Position: See pp. 183-184

- P. Notes About Selected Variables:
 - **F66SEC1-3** – are the variable names for sections not completed due to non-examination and reason. The first digit for each is the section number not completed. The second and third numbers for each are the reason codes:

8.4: Ocular Complications – Form 66

- 1 – Technical Difficulties
- 2 – Patient Uncooperative
- 3 – Cloudy Media
- 4 – Reaction to Angiography
- 5 – Other

Q. Computed Variables: None

R. Inter-Relationship With Other Datasets:

1. Ocular exam data were also collected on

Phase 1 Forms	SAS Dataset	See Section
18	R18.SD2	6.7.1
18E	R19.SD2	6.7.2

2. Information regarding ocular complications was also collected on

Phase 1 Forms	SAS Dataset	See Section
10	R10.SD2 (variables: F10OPLTD , F10OPLT)	2.3
83	R83.SD2 (ICD codes: 14.3 through 14.79 for variable F83ICDA ; ICD codes: 362.29 for variables F83PRE1-3)	9.1

F66VDATE ----- VERSION DATE DELETED

type: numeric daily date (int)
label: datelab

range: [6999,10510] units: 1
or equivalently: [01mar1979,10oct1988] units: days
unique values: 4 coded missing: 0 / 220

tabulation: Freq. Numeric Label
101 6999 03/01/79
117 7588 10/10/80
1 8323 10/15/82
1 10510 10/10/88

F66EVNT1 ----- ASSOCIATED EVENT CODE 1

type: numeric (float)

range: [16,66] units: 1
unique values: 3 coded missing: 199 / 220

tabulation: Freq. Value
1 16
18 18
2 66

F66EVNT2 ----- ASSOCIATED EVENT CODE 2

type: numeric (float)

range: [0,0] units: 0
unique values: 1 coded missing: 199 / 220

tabulation: Freq. Value
21 0

F66EVNT3 ----- ASSOCIATED EVENT CODE 3

type: numeric (float)

range: [0,0] units: 0
unique values: 1 coded missing: 199 / 220

tabulation: Freq. Value
21 0

F66EVNT4 ----- ASSOCIATED EVENT CODE 4

type: numeric (float)

range: [0,0] units: 0
unique values: 1 coded missing: 199 / 220

tabulation: Freq. Value
21 0

tabulation: Freq. Numeric Label
64 1 DONE
92 2 NOT DONE

F66PCOAG ----- PHOTOCOAGULARION DONE
type: numeric (float)
label: F66PCOAG

range: [1,2] units: 1
unique values: 2 coded missing: 52 / 220

tabulation: Freq. Numeric Label
119 1 NOT DONE
49 2 DONE

F66XENON ----- NUMBER OF TIMES XENON DONE
type: numeric (float)

range: [0,4] units: 1
unique values: 4 coded missing: 214 / 220

tabulation: Freq. Value
2 0
2 1
1 2
1 4

F66ARGON ----- NUMBER OF TIMES ARGON DONE
type: numeric (float)

range: [0,92] units: 1
unique values: 6 coded missing: 191 / 220

tabulation: Freq. Value
3 0
20 1
2 2
2 3
1 7
1 92

8.0: Chronic Events - Overview

F66CRYO ----- CRYO SURGERY DONE

type:	numeric (float)
label:	F66CRYO
range:	[1,2]
unique values:	2
tabulation:	Freq. Numeric Label
	128 1 NOT DONE
	7 2 DONE

F66DIATH ----- DIATHERMY DONE

type:	numeric (float)
label:	F66DIATH
range:	[1,2]
unique values:	2
tabulation:	Freq. Numeric Label
	132 1 NOT DONE
	1 2 DONE

F66VHEM ----- VITREOUS HEMORRHAGE

type:	numeric (float)
label:	F66VHEM
range:	[1,2]
unique values:	2
tabulation:	Freq. Numeric Label
	13 1 BEDREST
	5 2 VITRECTOMY

F66RETD ----- RETINAL DETACHMENT

type:	numeric (float)
label:	F66RETD
range:	[1,2]
unique values:	2
tabulation:	Freq. Numeric Label
	3 1 PHOTOCOAGULATION
	7 2 SCHLERAL BUCKLE

F66TRANS ----- TRANSFUSION

type:	numeric (float)
label:	F66TRANS
range:	[1,2]
unique values:	2
tabulation:	Freq. Numeric Label
	53 1 NO
	2 2 YES

8.0: Chronic Events - Overview

```
F66FINAL ----- FINAL DIAGNOSIS

      type: numeric (float)
      label: F66FINAL

      range: [1,6]                      units: 1
unique values: 6                      coded missing: 32 / 220

tabulation: Freq.  Numeric  Label
             23       1  AUTO INFARCTION
             71       2  RETINOPATHY
             54       3  STAGE III
