FRAMINGHAM HEART STUDY CODING MANUAL

Survival – Atrial Fibrillation/Flutter

COHORT: Original, Offspring, Generation 3, New Offspring Spouse, Omni 1, Omni 2

TIME INTERVAL: Through 2010

DATASET NAME: vr survaf 2011 m 0787d

OBSERVATIONS: 15448

Variables that define a unique record: PID.

This dataset contains validated endpoints information and should be used in conjunction with the corresponding AF file - in this case dataset vr afcum 2011 m 0687.

Please refer to the file vr_survaf_2011_m_0787_protocol.docx for further explanation of variable definitions.

This dataset includes follow-up time for the following events: Atrial Fibrillation/Atrial Flutter.

This dataset replaces vr_survaf_2010_m_0776.

This dataset is a modified version of the original dataset. Some observations were deleted due to consent restrictions. This coding manual is based on the original dataset. Therefore the value ranges, number of observations and/or cohorts found in the modified dataset, may differ from those stated in this manual.

IDTYPE

Variable name: IDTYPE

Description: Framingham Heart Study cohort identifier

Code or Value	Description	Count
0	Original Cohort	5209
1	Offspring Cohort	5124
2	New Offspring Spouse	103
3	Generation 3 Cohort	4095
7	Omni 1 Cohort	507
72	Omni 2 Cohort	410

ID

Variable name: ID

Description: Framingham Heart Study participant identifier within a cohort

Note: IDTYPE and ID taken together form a unique study participant identification number.

ID deleted - use random ID (PID)

PID

Variable name: PID

Description: Random ID

AFX

Variable name: AFX

Description: Atrial fibrillation/atrial flutter (AF)status

Code or Value	Description	Count
0	No	13407
1	Yes	2041

Note: This status refers to the initial case of atrial fibrillation/atrial flutter for each participant.

AFXDATE

Variable name: AFXDATE

Description: Date of atrial fibrillation/atrial flutter status

Units: Number of days since Exam 1

Code or Value	Description	Count
-8271 — 23069	Range of values	15448

Note: Date includes month, day and year, however, coding manual displays only month and year to preserve confidentiality.

This date corresponds to the date the participant had their initial AF or the date of censoring (last known date the participant did not have AF).

Please refer to the protocol for explanation as to how the censoring date was calculated.
