Framingham Heart Study Original Cohort Exam 14

05/28/1975-04/24/1978 N=2871

Exam Form Version

10-71 Personal and Family History
 12-78 Numerical Data, Medical History, Physical Examination, Electrocardiograph, Clinical Diagnostic Impression, X-Ray Report, Dementia Screening & Assessment of Functional Disability

Notes on Framingham Heart Study Main Exam Data Collection Forms

Multiple versions of each exam form were used at the time of data collection. However, only one version of each exam form has been provided in the samples below. The other versions, which can be found in the participants' charts, have the same variables as the sample exam forms, but may be placed in a different format.

On some of the sample exam forms, the same variable may be found on two different data sheets. An example of this would be variable "FA159" on original cohort exam 8, which is "Signs of CVA: Aphasia." This variable appears both in the physical examination and Exam VIII Code Sheet Card No. 4. The reason for the reappearance of variables is that one data sheet was used for collection of the data, while the other was used to enter the data into the computer. Variables appearing more than once on an exam form should hold the same value in both places for that particular participant.

NATIONAL HEART AND LUNG INSTITUTE & BOSTON UNIVERSITY

FRAMINGHAM HEART STUDY

Permission for Interview, Examination, Tests, and Record Review:

I understand that the purpose of this study is to collect information to aid in the understanding of several major diseases, especially heart and vascular diseases.

I, hereby, authorize the Framingham Heart Study to 1) interview me with respect to my past and present medical history, the medical history of my family, and other information such as occupation, education, home address, and place of birth 2) perform procedures such as might be done in my physician's office (examples: weight, blood pressure, respiratory test, electrocardiogram) 3) obtain samples of blood and urine 4) review past and future hospital, tumor registry, and physicians' medical records. It is my understanding that this information will be kept strictly confidential, and used for statistical, scientific and research purposes only. No use will be made of the information which would identify me.

Each of the test procedures and their risks and discomforts have been explained to me and all of my inquiries concerning these procedures have been answered. I know that I am free to withdraw my consent and to discontinue participation in the project or activity at any time. I also understand that no charge is to be made for any part of the examination.
