Notes on Framingham Heart Study Main Exam Data Collection Forms

Multiple versions of each exam form were used at the time of data collection. However, only one version of each exam form has been provided in the samples below. The other versions, which can be found in the participants' charts, have the same variables as the sample exam forms, but may be placed in a different format.

On some of the sample exam forms, the same variable may be found on two different data sheets. An example of this would be variable "FA159" on original cohort exam 8, which is "Signs of CVA: Aphasia." This variable appears both in the physical examination and Exam VIII Code Sheet Card No. 4. The reason for the reappearance of variables is that one data sheet was used for collection of the data, while the other was used to enter the data into the computer. Variables appearing more than once on an exam form should hold the same value in both places for that particular participant.

			1/ Indicate in examination columns which items of the following are
			found on the X-Ray.
			AH, GCE, LVH, PPA (prominent pulmonary artery), SLB (straight- ened left border), or OMC (other mitral contour).
		 	2/ List in stud any of the following known from history, or found
			to be present: Congenital HD (Specify type), Luetic HD, Thyrotoxic HD,
			Myocarditis, Pericarditis, SBE, Other (specify).
			3' indicate in examination columns which functional class is
	L		appropriate: \mathbf{I} , \mathbf{II} , \mathbf{III} , \mathbf{IV} .
			4/ List in stub any of the following known from history or found
			to be present: anemia. arthritis, asthma, cancer, chronic pulmonary disease,
			gallbladder disease, kidney disease, liver disease, NCA, peptic ulcer, syphilis, thyroid disease, toxemia of pregnancy.
			peptic urcer, syphilis, inyrotu utsease, toxenta or pregnancy.
			5/ Enter in examination column the number for the appropriate
			letter, as follows:
			1 No CVD 2 Minor condition
			3 See your doctor
			4 No change since previous exam 5 Non-CV abnormality
			Symbols: O Negative finding — (Dash) No data or unknown
			+ Positive finding present
