PE CODING GUIDELINES	
SOE 112	DO NOT CODE for isolated superficial vein thromboses
SOE 112	CLINICAL DIAGNOSIS OF PE W/O DEFINITE LAB VERIFICATION (Requires PE symptoms plus a documented PE source; V/Q scan & PAgam not performed or non-diagnostic Clinical Sx not attributable to other causes)

PE FINAL DIAGNOSTIC SUMMARY (circle appropriate code[s])		
PE024 SOE	110	PE by Pulmonary arteriogram, CTPA, or MRI
SOE PE025	111	PE by history and HIGH PROBABILITY ventilation/perfusion (V/Q) scan (only code if pulmonary arteriography not done)
SOE PE026	112	PE BY CLINICAL HIGH SUSPICION & DOCUMENTED SOURCE OF PE (DVT)
