To help people say how good or bad their state of health is, we have drawn a scale (rather like a thermometer) on which the best state you can imagine is marked 100 and the worst state you can imagine is marked 0.

I would like you to indicate on this scale how good or bad your own health is today, in your opinion. Please do this by drawing a line from the box below to whichever point on the scale indicates how good or bad your state of health is today.

12.06 Score: _____
[eq5d_score] [int(11)]

**Your own

14. Health Utilities Index

This next questionnaire asks about aspects of your health. When answering these questions please think about your health and your ability to do things everyday in the past 4 weeks. To define the 4 week period, please think about what the date was 4 weeks ago and recall the major events that you have experienced during this period. Focus your answers on your overall abilities, disabilities and how you felt during the past 4 weeks.

You may feel that some questions do not apply to you, but it is important that we ask the same questions of everyone. Also, a few questions are similar, but please answer each question independently.

Please read each question and consider answers carefully. For each question, select one answer that best describes your level of ability or disability during the past 4 weeks. Select the answer by checking the box. All information you provide is confidential. There are no right or wrong answers; what we want is your opinion about your abilities/ feelings.

*Definition of all the serious adverse events/ and adverse events are included in the Manual of Procedures.

List of Serious Adverse Events

[Please note - SAE has to be recorded using separate event sub-forms and should be submitted to the IRB and sponsors in expedited manner] *Detailed information on reporting timelines are provided in Manual of Procedures.

1. Severe hypoglycemia requiring medical attention/hospitalization (a hypoglycemic episode associated with transient central nervous system dysfunction without other apparent cause in which the individual was unable to treat him/herself and had help from another person to administer glucose or glucagon)
2. Acute hyperglycemia (e.g. Diabetic Keto Acidosis)
3. CVD events: Angina, non-fatal MI / Unstable Angina (ACS), revascularization procedure [angioplasty or CABG], TIA, Stroke (non-fatal), Arrhythmia
4. Gangrene or amputation due to diabetes-related peripheral neuropathy and peripheral vascular disease
5. Major bleeding (e.g. intracerebral or gastro-intestinal)
6. Renal: end-stage renal disease requiring renal replacement therapy (dialysis or transplantation)
7. Eyes: severe diabetes-related eye disease (defined as the requirement for retinal photocoagulation or similar treatment and development of diabetes-related blindness in either eye in a participant known not to have this condition at study entry)
8. Major infection: requiring hospitalization and/or parenteral antibiotics (UTI, skin infections, soft tissue infections, lower respiratory tract infections/physician-diagnosed pneumonia)
9. Inpatient hospitalization or prolongation of existing hospitalization
10. Death
11. Any other major health conditions/events (important medical event based upon appropriate medical judgment)

List of Adverse Events

[Please Note - Reporting of these events is covered in the regular CRF's / visits]:

1. Mild hypoglycemia not requiring medical attention
2. Side-effects of medications (e.g. *hepatic dysfunction or myopathy due to statins; dry cough due to ACE-I; negative effects of drugs on biochemical parameters such as hypo- or hyper- kalemia, hyperuricemia; and others per Investigator discretion*)
3. *PVD: intermittent claudication, rest pain*
4. *Allergic reactions/reactions on basis of drug interactions*
5. *Infection (UTI, skin infections, soft tissue infections, lower respiratory tract infections/physician-diagnosed pneumonia)*
6. *Weight gain*

To help people say how good or bad their state of health is, we have drawn a scale (rather like a thermometer) on which the best state you can imagine is marked 100 and the worst state you can imagine is marked 0.

I would like you to indicate on this scale how good or bad your own health is today, in your opinion. Please do this by drawing a line from the box below to whichever point on the scale indicates how good or bad your state of health is today.

12.06 Score: _____
[eq5d_score] [int(11)]

**Your own

14. Health Utilities Index

This next questionnaire asks about aspects of your health. When answering these questions please think about your health and your ability to do things everyday in the past 4 weeks. To define the 4 week period, please think about what the date was 4 weeks ago and recall the major events that you have experienced during this period. Focus your answers on your overall abilities, disabilities and how you felt during the past 4 weeks.

You may feel that some questions do not apply to you, but it is important that we ask the same questions of everyone. Also, a few questions are similar, but please answer each question independently.

Please read each question and consider answers carefully. For each question, select one answer that best describes your level of ability or disability during the past 4 weeks. Select the answer by checking the box. All information you provide is confidential. There are no right or wrong answers; what we want is your opinion about your abilities/ feelings.

To help people say how good or bad their state of health is, we have drawn a scale (rather like a thermometer) on which the best state you can imagine is marked 100 and the worst state you can imagine is marked 0.

I would like you to indicate on this scale how good or bad your own health is today, in your opinion. Please do this by drawing a line from the box below to whichever point on the scale indicates how good or bad your state of health is today.

12.06 Score: _____
[eq5d_score] [int(11)]

Your own health state today

13. Diabetes Treatment Satisfaction

The following questions are concerned with the treatment for your diabetes (including insulin, tablets, and/or diet) and your experience over the past few weeks. Please answer each question by marking a number on every scale.

14. Health Utilities Index

This next questionnaire asks about aspects of your health. When answering these questions please think about your health and your ability to do things everyday in the past 4 weeks. To define the 4 week period, please think about what the date was 4 weeks ago and recall the major events that you have experienced during this period. Focus your answers on your overall abilities, disabilities and how you felt during the past 4 weeks.

You may feel that some questions do not apply to you, but it is important that we ask the same questions of everyone. Also, a few questions are similar, but please answer each question independently.

Please read each question and consider answers carefully. For each question, select one answer that best describes your level of ability or disability during the past 4 weeks. Select the answer by checking the box. All information you provide is confidential. There are no right or wrong answers; what we want is your opinion about your abilities/ feelings.

To help people say how good or bad their state of health is, we have drawn a scale (rather like a thermometer) on which the best state you can imagine is marked 100 and the worst state you can imagine is marked 0.

I would like you to indicate on this scale how good or bad your own health is today, in your opinion. Please do this by drawing a line from the box below to whichever point on the scale indicates how good or bad your state of health is today.

12.06 Score: _____
[eq5d_score] [int(11)]

**Your own
health state

Instructions for Continuation (after completion of Form E Part 1)

- Attach Reports of ECG and Form G-Eye Exam.**

- Control Group:** Take participant to STUDY PHYSICIAN to complete PART 2 of Form E. After completion, enter Form E Parts 1 & 2 into eCRF. Include all source documents in patient's trial folder.

- Intervention Group:**
 - (1) Enter Form E Sections 1-4 into EHR-DSS (including update of contact information)
 - (2) Review patient medications. Update medication changes in writing on Form Z.
 - (3) Provide paper Form Z (with medication update) and rest of Form E Part 2 to STUDY PHYSICIAN during consultation with participant.
 - (4) Attach completed Form Z to this Form E. Update patient with information.
 - (5) After patient leaves, enter Form Z and rest of Form E in eCRF.
 - (6) Include all source documents in patient's trial folder.

PART 2: complete by STUDY PHYSICIAN

2. ECG and Eye Exam

May use results within past 1 month for ECG and Form G-Eye Exam (attach to end of this form).
Otherwise, attempt to complete TODAY, or ensure that testing is done within 2 weeks of today's date.
Update in paper and eCRF as soon as available. Retain copies of ECG and eye exam results as source documents.
