

Table 1.1 Non-PSG Data Collected SHHS Exam 1 and Exam 2

Data Collection Form	SHHS Exam 1 (Nov 1995-Jan 1998) Completed by/when	SHHS Exam 2 (Jan 2001–June 2003) Compared to Baseline	Content
Contact Form	Interviewer/recruitment	Revised	Final disposition of recruitment for Follow-up Visit 2; level of participation
Spirometry	Obtained from cohort data.	---	FEV1 – Forced Expiratory Volume and FVC – Forced Vital Capacity
Health Interview	Study personnel/home visit	Revised and standardize across sites	Prevalent respiratory disease, aspirin use previous 2 weeks, previous night rest, naps and stress on day of PSG, Restless Legs syndrome questions.
ECG	--	Study personnel/home visit and morning after (new)	Quality assurance and tracking for ECG
Physical Measurements	Study personnel/home visit	Revised and expanded BP form	Height, weight, neck circumference, seated BP, ankle-arm index doppler BP
Medications	Study personnel/home visit	Revised	Rx and non Rx medications taken in the last two weeks, and whether on day of home visit
Night Medications	Participant/morning after PSG (only participants who have PSG)	New form: previously collected on Morning Survey	Medications taken between the time the technician departed and the end of the PSG
Sleep Habits and Lifestyle Questionnaire	Participant/Mailed prior to home visit, collected at home visit	Revised Sleep Habits Questionnaire	Sleep habits, snoring, apnea, sleepiness, tobacco, caffeine and alcohol use
Quality of Life Survey	Participant/At all but Strong Heart Field Sites	Unchanged	SF-36
Morning Survey	Participant with PSG/Morning after PSG	Revised	Sleep quality, medications, alcohol caffeine and tobacco use, nasal status, and presence of bed partner on night of PSG
Alerts and Adverse Events	Study personnel/at home visit (for all participants)	Revised Adverse Events form	Immediate and urgent medical alerts, other problems on night of PSG
Alerts and Adverse Events Action	Study personnel/at home visit, and when action taken (for participants who had an alert or AE)	Revised Adverse Events form	Action taken for medical alerts and adverse events, including referral and physician notification.

Table 1.2 CVD Outcomes - Adjudicated events SHHS

Source	Outcome Data
<p>Provided by parent cohorts: ARIC, CHS, FHS, and SHS which had mechanisms in place for determining CVD outcomes since start of SHHS.</p> <p>SHHS subjects in Tucson and New York – implemented their own procedures for ascertaining and adjudication CVD outcomes closely modeled on those of CHS.</p> <p>All dates for adjudicated events have been provided as elapsed time from SHHS 1 PSG.</p>	<ol style="list-style-type: none"> a. Hospitalized acute MI (HAMI) b. Coronary surgical intervention – PTCA – CABG c. Congestive Heart Failure (CHF) d. Coronary heart disease death e. Any coronary heart disease (CHD) – (Summary a.b.d.) f. Any cardiovascular disease (CVD) – (Summary a-d) g. Angina pectoris (AP) – at CHS and FHS only h. Any stroke, hemorrhagic stroke, subarachnoid hemorrhage, intracerebral hemorrhage, non-hemorrhagic stroke. i. All fatal strokes will be classified both by most specific etiology determined and as Afatal stroke.
