TAAG
Workshop Attendance
Derived Variable Dictionary

This document contains a description of variables derived by the Coordinating Center in response to analysis requests for deriving variables for Dose and Reach for Process Evaluation based on teachers' attendance at TAAG workshops. The dataset was compiled by merging data from the teacher registration form (DTRA), PE workshop attendance forms (PWAB, PWAC), HE workshop attendance forms (HWAB, HWAC), and data manually collected from study site Process Evaluation Coordinators to create the most complete and accurate file for use in describing workshop attendance.

TAAG Workshop Attendance Derived Variables

Table of Contents

Variable	**Description**
ID	Teacher ID
TYPE	Type of workshop: PE or HE
YEAR	Year
WKSHOP	Type of workshop
MAKEUP	Makeup Workshop ('Y')
SEQNO	Sequence number of workshop
SESSION	Workshop session
EXPE1	Attendance expected at Year 1 PE workshops
EXPE2	Attendance expected at Year 2 PE workshops
EXHE1	Attendance expected at Year 1 HE workshops
EXHE2	Attendance expected at Year 2 HE workshops
HWAC0C	Date of HE Workshop (SAS date)
HWAC0E	Time start: HE workshops
HWAC0F	Time end: HE workshops
PWAC0A	Date of PE Workshop (SAS date)
PWAC0E	Time start: PE workshops
PWAC0F	Time end: PE workshops

TAAG Workshop Attendance Derived Variables

TEACHERID Teacher ID

The list of Teacher IDs for teachers expected to attend the workshops was taken from the Teacher Registration form (DTRA).

TYPE   Type of workshop: PE or HE

      HE = HE workshop

      PE = PE workshop

YEAR   Year

      1= Year 1 (Series 21)

      2= Year 2 (Series 31)

WKSHOP   Type of workshop

      Full   = Full day workshop; either PE or HE

      Booster1 = First PE booster

      Booster2 = Second PE booster

MAKEUP   Makeup Workshop ('Y')

      'Y' indicates that the workshop attended was a makeup workshop

SEQNO   Sequence number of workshop

      Ranges from 1 to 12.

Session   Workshop session

      Session number of workshop. Ranges from 1-81. Usage differed by workshop type and site (e.g., 71 & 81 apparently refer to session 1 in years 1 and 2 respectively for HE workshops), so the utility of this variable is questionable.

EXPE1 Attendance expected at Year 1 PE workshops

  Expected attendance was based on variables in the teacher registration form indicating the semesters in which each teacher taught PE. If a teacher was

flagged as teaching PE in either semester of year 1, they were coded as expected at PE workshops in year 1.

    0 = Not expected

    1 = Expected

EXPE2 Attendance expected at Year 2 PE workshops

Expected attendance was based on variables in the teacher registration form indicating the semesters in which each teacher taught PE. If a teacher was flagged as teaching PE in either semester of year 2, they were coded as expected at PE workshops in year 2.

    0 = Not expected

    1 = Expected

EXHE1 Attendance expected at Year 1 HE workshops

Expected attendance was based on variables in the teacher registration form indicating the semesters in which each teacher taught HEAC. If a teacher was flagged as teaching HEAC in either semester of year 1, they were coded as expected at HE workshops in year 1.

    0 = Not expected

    1 = Expected

EXHE2 Attendance expected at Year 2 HE workshops

Expected attendance was based on variables in the teacher registration form indicating the semesters in which each teacher taught HEAC. If a teacher was flagged as teaching HEAC in either semester of year 2, they were coded as expected at HE workshops in year 2.

    0 = Not expected

    1 = Expected

PWAC0A Date of PE Workshop (SAS date)

SAS date of PE workshop

PWAC0E Time start: PE workshops

Start time of PE workshop (HH:MM:SS)

PWAC0F Time end: PE workshops

End time of PE workshop (HH:MM:SS)

HWAC0C Date of HE Workshop (SAS date)

SAS date of HE workshop

HWAC0E Time start: HE workshops

Start time of HE workshop (HH:MM:SS)

HWAC0F Time end: HE workshops

End time of HE workshop (HH:MM:SS)
